1.

Glass trophies are a perfect idea for business, occasional and sport awards. They are perfect as original thanks to employees or a gift for a contractor, as well as a trophy for the participant of the competition .- and the gift for the loved one.

Choose the type of personalization

2.

We offer personalization of glass statuettes to get the unique look of them. This effect can be obtained with Luxorjet printing, laser engraving and 3D engraving based on placing a three-dimensional design inside the glass.

Choose a case

LuxorJet

Imprints made with LuxorJet printer are very durable. The colours are of perfect fidelity. High resolution gives an opportunity to perform exceptional imprints and the ink used is enviromentally friendly and presents vivid colours.

Colour overprint with white colour as a background under the colour pixels

Getting a more visible overprint by using the white colour as a background. The rest of the glass trophy is transparent.

Colour overprint with white underprint on the whole surface

As a result of covering the whole back of the glass with white paint, graphic is clearly visible from the front. There is no transparency effect.

colour overprint without white underprint

The graphic design is printed without using white paint. Thanks to this technique, the print is visible and gives the transparency effect.

Laser engraving

We engrave on a glass surface any vector graphic with or without the paint filling. Thanks to a specialized software we are able to engrave photos. Our expanded machinery park allows to realize big orders in a short time

Laser engraving

Laser engraving of the glass surface is the easiest way to personalize the trophy. This method is the most durable as well as resistant to external conditions, decoration technique.

Laser engraving with paint filling

Paint filling in a selected colour of all or selected parts of the design, previously engraved with a laser. Eco-friendly, long-lasting paints are perfect for filling engraved graphics, e.g. logos. The applied effect will distinguish the trophy and give an individual and unique character.

3D laser engraving

Thanks to a specialized machine, we engrave inside the trophy – starting from simple graphics, to complicated 3D models, without damaging the surface structure.
